

INDEX OF SUBJECTS

A

- Abdomen, smooth muscle tumors of, morphologic predictors of biologic behavior of, 519
- Abortion, during first trimester, histology and *Ureaplasma urealyticum* culture in, 729
- Acanthamoeba*
clinical and environmental, phylogenetic analysis of endosymbionts from, 263
keratitis caused by, 16
- Acid-fast bacilli infections, of bone marrow biopsy specimens in human immunodeficiency virus, 549
- Acid-fast stain, sensitivity in open lung biopsy, 736
- Acquired immunodeficiency syndrome. *See also* Human immunodeficiency virus
cryptosporidia in, enteric distribution of, 420
microsporidiosis diagnosis in, electron microscopic, 548
myelodysplasia associated with, flow cytometric analysis of p24 positive bone marrow mononuclear cells and, 549
plasma cell myeloma in, 633
proportion of T helper cells expressing β -1 integrin receptor CD29 in, 260
pulmonary malacoplakia associated with *Rhodococcus equi* infection in, 459
- Activated partial thromboplastin time, uncertainty of assays of, effect on clinical decisions in heparin therapy, 237
- Adenocarcinoma
coccoid forms of *Helicobacter pylori* in human stomach and, 503
colonic, cytokeratin immunostaining for separating from pulmonary adenocarcinomas, 764
endometrial
flow-cytometric analysis of nuclear DNA content in, 341
p53 protein and c-erbB-2 protein expression in, 76
gastric, familial juvenile polyposis related to, 91
mucinous, of esophagus and gastroesophageal junction, clinicopathologic characterization of, 531
prostatic, clefting in, 536
pulmonary, cytokeratin immunostaining for separating from colonic adenocarcinomas, 764
- Adrenal gland, immunohistochemical detection of neuroblastomatous foci in composite adrenal pheochromocytoma-neuroblastoma and, 163
- Age. *See also* Children
crosslinked fibrin dimers over time in community dwelling elderly subjects and, variability of plasma interleukin-6 and, 802
gestational, predictive model for fetal lung maturity using, 788
prostate-specific antigen and, S31
- Aldosterone-to-renin activity ratio, in diagnosis of primary hyperaldosteronism, 257
- Amniotic fluid, refrigeration and freezing of, effects on fetal lung maturity testing and lamellar body density counts, 541
- Amphetamines, specificity of assays for, 254
- Amplification refractory mutation system, detection of polymorphism at nucleotide 3206 of *apo C III* gene in hypertriglyceridemia and lipidemia by, 254
- Analytic precision, of automated immunoassays, 3
- Androgen deprivation therapy, for prostate cancer, S38
- Anemia
automated reticulocyte counting and reticulocyte cellular indices and, 623
flow cytometric reticulocyte analysis in, 468
- Angiomyolipoma, renal, morphological spectrum and value of HMB45 and PAS-diastase stains in diagnosis of, 534
- Angiosarcoma
cutaneous, after radiation therapy for breast carcinoma, 757
of thyroid gland, endothelial differentiation and, 322
- Annexin V binding, membrane phospholipid asymmetry measurement by, in normal and sickle-cell erythrocytes, 259
- Antibodies. *See also specific antibodies*
immunophenotypic abnormalities in paraffin-embedded B-lineage non-Hodgkin's lymphomas and, 825
- Anticardiolipin antibodies
immunoreactivity of, repeated freeze-thaw cycles and, 586
primary hypercoagulable states and, with spontaneous or recurrent thrombosis, 797
- Anticoagulants
International Normalized Ratio and. *See* International Normalized Ratio
response to activated protein C, 547
- Antifibrinolytic agents, orthotopic liver transplantation and bleeding diathesis and, 816
- Antigens
carbohydrate, hepatic neoexpression and increased plasma levels of, in chronic inflammatory liver diseases, 176
leishmanian, in localized leishmania lymphadenitis, 11
paraffin-resistant, detectable by antibodies L26 and polyclonal CD3, prediction of cell lineage of diffuse aggressive non-Hodgkin's lymphomas and, 284
- Anti-liver/kidney microsomal autoantibodies, Western blot for determination of, 542
- Anti-mitochondrial microsomal autoantibodies, Western blot for determination of, 542
- Antimony compounds, tri- and pentavalent, in leishmania, 263
- Anti-neutrophil cytoplasmic antibodies
assay for, to distinguish between vasculitis disease activity and complications of cytotoxic therapy, 589
enzyme-linked immunosorbent assay and indirect immunofluorescence for determination of, 543
- Antithrombin III, primary hypercoagulable states and, with spontaneous or recurrent thrombosis, 797
- Aperimetric method, for L-lactate determination in whole blood, 253
- apo C III* gene, polymorphism at nucleotide 3206 of, in hypertriglyceridemia and lipidemia, amplification refractory mutation system detection of, 254
- Apoptosis, of peripheral blood lymphocytes, acute infectious mononucleosis and, 544
- Aspartate aminotransferase, serum, measurement of, bacterial contamination and, 554

INDEX OF SUBJECTS

A

- Abdomen, smooth muscle tumors of, morphologic predictors of biologic behavior of, 519
- Abortion, during first trimester, histology and *Ureaplasma urealyticum* culture in, 729
- Acanthamoeba*
clinical and environmental, phylogenetic analysis of endosymbionts from, 263
keratitis caused by, 16

- Analytic precision, of automated immunoassays, 3
- Androgen deprivation therapy, for prostate cancer, S38
- Anemia
automated reticulocyte counting and reticulocyte cellular indices and, 623
flow cytometric reticulocyte analysis in, 468
- Angiomyolipoma, renal, morphological spectrum and value of HMB45 and PAS-diastase stains in diagnosis of, 534
- Angiosarcoma
cutaneous, after radiation therapy for breast carcinoma, 757
of thyroid gland, endothelial differentiation and, 322
- Annexin V binding, membrane phospholipid asymmetry measurement by, in normal and sickle-cell erythrocytes, 259
- Antibodies. *See also specific antibodies*
immunophenotypic abnormalities in paraffin-embedded B-lineage non-Hodgkin's lymphomas and, 825
- Anticardiolipin antibodies
immunoreactivity of, repeated freeze-thaw cycles and, 586
primary hypercoagulable states and, with spontaneous or recurrent thrombosis, 797
- Anticoagulants
International Normalized Ratio and. *See* International Normalized Ratio
response to activated protein C, 547
- Antifibrinolytic agents, orthotopic liver transplantation and bleeding diathesis and, 816
- Antigens
carbohydrate, hepatic neoexpression and increased plasma levels of, in chronic inflammatory liver diseases, 176
leishmanian, in localized leishmania lymphadenitis, 11
paraffin-resistant, detectable by antibodies L26 and polyclonal CD3, prediction of cell lineage of diffuse aggressive non-Hodgkin's lymphomas and, 284
- Anti-liver/kidney microsomal autoantibodies, Western blot for determination of, 542
- Anti-mitochondrial microsomal autoantibodies, Western blot for determination of, 542
- Antimony compounds, tri- and pentavalent, in leishmania, 263
- Anti-neutrophil cytoplasmic antibodies
assay for, to distinguish between vasculitis disease activity and complications of cytotoxic therapy, 589
enzyme-linked immunosorbent assay and indirect immunofluorescence for determination of, 543
- Antithrombin III, primary hypercoagulable states and, with spontaneous or recurrent thrombosis, 797
- Aperimetric method, for L-lactate determination in whole blood, 253
- apo C III* gene, polymorphism at nucleotide 3206 of, in hypertriglyceridemia and lipidemia, amplification refractory mutation system detection of, 254
- Apoptosis, of peripheral blood lymphocytes, acute infectious mononucleosis and, 544
- Aspartate aminotransferase, serum, measurement of, bacterial contamination and, 554

Aspiration cytology. *See* Fine needle aspiration
 Astrocytoma, protoplasmic, clinicopathologic study of, 518
 Atherosclerosis, intimal lipid vesicles in, relationship to foam cells, morphometric and ultrastructural studies of, 523
 Atypia, in ovarian endometriotic cysts, 415
 Atypical glandular cells of undetermined significance, in cervicovaginal smears, surgical pathology correlation of, 530
 Autologous blood donation, by high-risk versus non high-risk patients, safety of, 275
 Automated methods. *See also* Computer imaging
 Cobas-Helios analyzer, 223
 for edge detection in image analysis, 539
 for fine needle aspiration of breast lesions, thin-layer and convention preparations for, 349
 immunoassays, enhancing performance of, 3
 MAXM hematology analyzer, 36
 NOVA Celltrak 12, 306
 recognition of glandular features in benign and malignant tissue by, 538
 for reticulocyte counting, 623
 for white blood cell differentials, in children, 544

B

BacT/Alert anaerobic standard, FAN blood culture bottles compared with, 551
 BACTEC NR 660 blood culture system, for detection of *Cryptococcus neoformans*, 741
 Bacteria. *See also* specific bacteria
 band between CK-MB and CK-BB caused by contamination by, 540
 contamination with, serum aspartate aminotransferase measurement and, 554
 isolated from contaminated platelets, generation times of, 552
 sensitivity of special stains and culture in open lung biopsy and, 736
 Band neutrophil counts, for diagnosis of infection in patients with normal total leukocyte counts, 650
 Bartonella (*Rochalimaea*) *quintana*, blood isolate fingerprinting using polymerase chain reaction, 262
 Basal cell specific anti-cytokeratin antibody, in prostate cancer diagnosis, 537
 B cell(s)
 CD20-positive T-cell lymphoma and, 483
 differentiation of, regulation of syndecan-1 mRNA levels during, 543
 monoclonal, in hepatitis C virus infection and mixed cryoglobulinemia, type II, 278
 prediction of cell lineage of diffuse aggressive non-Hodgkin's lymphomas and, paraffin-resistant antigens detectable by antibodies L26 and polyclonal CD3 for, 284
 B-cell neoplasms
 lymphomas, immunohistochemical and colorimetric *in situ* hybridization staining for detection of light chain restriction in, 546
 monoclonal B-cell population detection in decalcified, plastic-embedded bone marrow biopsies with polymerase chain reaction and, 850
 bcl-2 oncogene
 expression in Reed-Sternberg cells in Hodgkin's disease, nodular sclerosis subtype of, 464
 in gastric carcinoma, early and advanced, 532
 immunophenotypic abnormalities in paraffin-embedded B-lineage non-Hodgkin's lymphomas and, 825

immunoreactivity for, in stage I non-small cell lung carcinoma, 526
 in small cell lung carcinoma, 526
 bcr gene rearrangement, detection in leukemic blasts, 258
 Bedside testing, length of stay and, 553
 Benchmarking, for quality improvement, 567
 Benzodiazepines, serum concentrations determined by radioreceptor assay, for therapeutic-dose recipients, 605
 BER-EP4, immunohistochemical staining of small cell lung carcinoma in transbronchial and open-lung biopsy specimens and, 406
 BerH2, in florid immunoblastic proliferations, 292
 6-Beta-hydroxycortisol, urinary, analysis, biological variation, and reference ranges for, 542
 Bethesda System, assessment of cervicovaginal smear adequacy and, 354
 Bilirubin, circulating intercellular adhesion molecule-1 concentration in liver disease and, 600
 Biopsy. *See also* Fine needle aspiration; specific types and sites of biopsy
 prostate cancer grading and, S38
 Bladder, ASCP survey on anatomic pathology examination of, 715
 Bladder cancer, prognostic factors in, pathologic, immunohistochemical, and DNA flow-cytometric study of, 109
 Bleeding diathesis, orthotopic liver transplantation and, 816
 Blood
 peripheral, megakaryocytes in, 547
 umbilical cord, stored
 proliferative activity of hematopoietic stem/progenitor cells in, flow cytometric cell cycle analysis measurement of, 546
 stem cells from, number of colonies produced by and factor-dependent cell cycle of, 260
 volume determination of, as function of hematocrit and mass in preservative solutions and saline, 812
 Blood count, MAXM hematology analyzer and, 36
 Blood cultures
 BacT/Alert anaerobic standard compared with FAN blood culture bottles for, 551
 BACTEC NR 660 blood culture system for detection of *Cryptococcus neoformans* and, 741
 positive, effect of processing delays on time to detection of, 551
 quality assurance and, 552
 Blood diseases, T-cell lymphocytosis associated with invasive thymomas, 447
 Blood donation, autologous, by high-risk versus non high-risk patients, safety of, 275
 Blood gases, central versus satellite laboratory testing of, quantification of medical and operational factors determining, 7
 Blood glucose. *See* Glucose monitoring
 Blood transfusions, autologous donation by high-risk versus non high-risk patients, safety of, 275
 Blue nevus, cells of, in axillary lymph nodes, incidence and immunohistochemistry of, 102
 Bombesin, immunohistochemical staining of small cell lung carcinoma in transbronchial and open-lung biopsy specimens and, 406
 Bone, giant cell tumor of, immunohistochemical markers of lineage and proliferation in, 518
 Bone marrow
 acid-fast bacilli infections of biopsy specimens of, in human immunodeficiency virus, 549
 hematogones in, immunophenotypic features, clinical settings, and differential diagnosis and, 202
 lymphocyte subsets in, reference ranges for, 544
 p24 positive mononuclear cells of, in myelodysplasia associated with

- acquired immunodeficiency syndrome, flow cytometric analysis of, 549
 - progenitor cells in, reference ranges for, 544
 - Bone marrow biopsy
 - monoclonal B-cell population detection in decalcified, plastic-embedded bone marrow biopsies with polymerase chain reaction and, 850
 - terminal deoxynucleotidyl transferase staining in acute leukemia and, 640
 - Bone marrow histiocytosis, autologous graft failure and, 713
 - Bone marrow transplantation
 - autologous graft failure and, 713
 - B-cell precursor bone marrow reconstitution after, 231
 - failure to engraft after, 821
 - gastric vascular ectasia associated with, 194
 - Bootstrap analysis, influence of reference mean prothrombin time on International Normalized Ratio and, 806
 - Brainerd diarrhea, 515
 - Breast cancer, S1
 - allelic loss at chromosome 17q21 in, 527
 - Ca 15.3 in, 542
 - CD44 isoform expression in normal and malignant mammary epithelium and, 526
 - chemotherapy for, histologic grade of locally advanced infiltrating ductal carcinoma after treatment with induction chemotherapy, 154
 - cyclin D1 in, immunohistochemistry of, 695
 - ductal, angiogenesis of, 529
 - erbB*-2 growth factor receptors and their ligands in, S13
 - estrogen receptors in. *See* Estrogen receptors
 - growth factors in, quantitation with MIB1 and Ki67 antibodies, 171
 - histologic features of, chemotherapy and, 147
 - hormone receptors in. *See also* Estrogen receptors; Progesterone receptors
 - immunohistochemical detection of, biochemical method and rationale for changeover in community hospital, 527
 - monoclonal antibodies for detection in formalin-fixed paraffin-embedded tissue, 528
 - immunocytochemical analysis of hormone receptors in, 68
 - immunoperoxidase staining for phosphotyrosine in, nonrelationship to nuclear grade, ploidy, S-phase fraction, and p53, 527
 - in males, S25
 - metastatic, benign melanocytic nevus cells in axillary lymph nodes and, incidence and immunohistochemistry of, 102
 - MIB-1 in
 - as predictor of survival, 527
 - as proliferative index determination as predictor of tumor aggressiveness, 527
 - prognosis of, based on histopathologic data, S3
 - quantitative DNA in paraffin-embedded tissue by image analysis and flow cytometry in, 528
 - radiation therapy for, cutaneous angiosarcoma and atypical vascular lesions of skin breast after, 757
 - in situ, angiogenesis of, 529
 - stereotactic breast core biopsies in, quality and efficacy of, 529
 - in young women, with early relapse, 528
 - Breast implants
 - silicone bag, histologic features of breast capsules reflecting surface configuration and composition of, 655
 - tissue reaction to, 565
 - Breast lesions
 - fine needle aspiration of, thin-layer and convention preparations for, 349
 - nonpalpable
 - fine needle aspiration of, ultrasound-guided, 98
 - stereotactic fine needle aspiration of, 529
 - Breast papilloma
 - cytologic distinction of, 530
 - large duct and peripheral, clinicopathologic study of, 529
 - Breast preserving surgery, cutaneous angiosarcoma and atypical vascular lesions of skin breast after radiation therapy for breast carcinoma and, 757
 - Bromodeoxyuridine labeling, correlation with proliferating cell nuclear antigen indices in formalin- and alcohol-fixed tissue, 539
 - Bronchiolar basement membrane, changes associated with bronchiolitis obliterans in lung allografts and, 516
 - Bronchiolitis obliterans, in lung allografts, bronchiolar basement membrane changes associated with, 516
- C**
- Ca 15.3, in breast cancer, 542
 - Calcofluor white
 - rapid staining techniques for lower respiratory specimens emphasizing, 550
 - as screen for microsporidial spores in stool specimens, 263
 - Calmodulin, osteoclastic hydrochloric acid transport regulation by, 257
 - Carbamazepine, displacement from serum carrier proteins, in normal and uremic sera, 255
 - Carbohydrate antigen, hepatic neoexpression and increased plasma levels of, in chronic inflammatory liver diseases, 176
 - Carcinocarcinoma, of lung, 360
 - Carcinoembryonic antigen
 - immunohistochemical staining of small cell lung carcinoma in transbronchial and open-lung biopsy specimens and, 406
 - in rectal mucosa, following resection for colon neoplasia, 533
 - Carcinoid
 - of lung, 360
 - of prostate, prostate-specific antigen and, S31
 - Carcinoma. *See also specific types and sites of carcinoma*
 - embryonal, immunohistochemical and DNA flow-cytometric study of, 397
 - hepatocellular, DNA ploidy in, flow cytometric analysis of, 80
 - lobular, invasive, classical and pleomorphic variants of, correlation of mitotic figure content, Ki-67 expression, microvessel density, and survival with, 526
 - neuroendocrine, of lung, 360
 - sarcomatoid, endothelial differentiation in angiosarcoma of thyroid gland and, 322
 - spindle-cell, of lung, 331
 - transitional cell, of bladder, prognostic factors in, pathologic, immunohistochemical, and DNA flow-cytometric study of, 109
 - Carcinosarcoma, of lung, 331
 - Cathepsin D
 - immunophenotypic detection of, in routinely processed tissue sections in granular cell tumor, 520
 - in malignant melanoma, as prognostic indicator, 521
 - Catheter related sepsis, sonicated vascular catheter tip cultures associated with, nonutility of adjuvant cytospin gram stain and, 517
 - CD4, single tube assay for measuring absolute CD4 counts by flow cytometry, 548
 - CD8, B-cell chronic lymphocytic leukemia positive for, 212
 - CD10, hematogones in bone marrow and, 202
 - CD30 antigen-antibody, in florid immunoblastic proliferations, 292

- CD31
endothelial differentiation in angiosarcoma of thyroid gland and, 322
in granulocytic sarcomas, immunohistochemical evaluation in formaldehyde-fixed, paraffin-embedded tissue, 55
- CD34
endothelial differentiation in angiosarcoma of thyroid gland and, 322
in granulocytic sarcomas, immunohistochemical evaluation in formaldehyde-fixed, paraffin-embedded tissue, 55
hematopoietic precursors positive for, peripheral blood stem cell harvest in paroxysmal nocturnal hemoglobinuria, 517
- CD34^{hi} lymphomononuclear cell count, as measure of chemotherapy/G-CSF-induced progenitor cell mobilization, during leukophoretic stem cell harvest, 258
- CD44
immunoreactivity in soft tissue sarcomas, 519
isoform expression in normal and malignant mammary epithelium, 526
- CD46, as receptor for field isolates of measles virus, 261
- CD56/16, expression in acute myeloid leukemia, 545
- CD68
in granulocytic sarcomas, immunohistochemical evaluation in formaldehyde-fixed, paraffin-embedded tissue, 55
immunophenotypic detection of, in routinely processed tissue sections in granular cell tumor, 520
- Ceftriaxone, carbamazepine displacement from serum carrier proteins by, in normal and uremic sera, 255
- Cell culture, varicella-zoster virus isolation using, 733
- Celltrak 12, 306
- Cell volume, hydration of red cells in α and β thalassemia and, 217
- c-erbB-2 protein
correlation of clinicopathologic features of serous ovarian tumors with immunohistochemical expression of, 531
expression in endometrial adenocarcinoma, 76
in gastric carcinoma, distribution of expression of, 532
- Cervical carcinoma
loop electrosurgical excision procedure in, efficacy and cytologic pitfalls of, 531
squamous and serous differentiation as predictors of disease recurrence in stage I or II, 530
- Cervical dysplasia, Cyto-Rich monolayer smears compared with conventional prepared smears in detection of, 530
- Cervical intraepithelial neoplasia, correlation of cytopathologic diagnoses with detection of, 182
- Cervicovaginal smears
assessment of smear adequacy and, 354
atypical glandular cells of undetermined significance in, surgical pathology correlation of, 530
Cyto-Rich monolayer smears compared with conventional prepared smears in detection of cervical dysplasia, 530
- Chemiluminescence assay, for human growth hormone, in serum, 253
- Chemotherapy
anti-neutrophil cytoplasmic antibody assay to distinguish between vasculitis disease activity and complications of, 589
for breast cancer, histologic grade of locally advanced infiltrating ductal carcinoma after treatment with induction chemotherapy, 154
histologic features of breast cancer and, 147
P-glycoprotein in Ewing's sarcoma and peripheral primitive neuroectodermal tumors before and after, immunohistochemical detection of, 61
progenitor cell mobilization induced by, CD34^{hi} lymphomononuclear cell count as measure of, during leukophoretic stem cell harvest, 258
transplantation regimen of, gastric vascular ectasia associated with bone marrow transplantation and, 194
- Children
fibroblastic lesions in, proliferating cell nuclear antigen and Ki-67 expression in, 543
gastric metaplasia and duodenitis in, association with *Helicobacter pylori* infection, 188
neuroblastoma in, somatostatin receptors in, 752
for white blood cell differentials in, automated methods for, 544
- Chlamydia trachomatis*, nucleic acid probe testing versus off-site testing for detection from endocervical specimens, 551
- Chlamydiazyme test, confirmatory assay to increase sensitivity and specificity of, 724
- Cholecystitis, chronic acalculous versus calculous, absence of differentiating histopathologic features in, 533
- Cholestasis, circulating intercellular adhesion molecule-1 concentration in, 600
- Chondrosarcoma, dedifferentiated, with rhabdomyosarcoma differentiation, 519
- Chromagranin A, immunohistochemical staining of small cell lung carcinoma in transbronchial and open-lung biopsy specimens and, 406
- Chromatin, computer-assisted quantitative description of chromatin pattern in soft tissue tumors and, 780
- Chromosome 16, deletion of entire α globulin locus causing α -thalassemia, 646
- Chromosome 3p, loss of heterozygosity in microscopic premalignant and malignant renal lesions in von Hippel-Lindau disease and, 515
- Chromosome 17q21, allelic loss at, in breast carcinoma, 527
- Ciba Corning ACS:180 automated immunoassay system, 3
- Cirrhosis, orthotopic liver transplantation and bleeding diathesis and, 816
- Coagulation factor VIII, endothelial differentiation in angiosarcoma of thyroid gland and, 322
- Coagulation factor X, targeted glycosylation of, as probe of structure and function, 256
- Coagulation factor XIIIa, dendrocytes positive for, in tendon sheath fibroma of, 519
- Coagulation testing
need for duplicate testing and, 242
screening tests for, 150
- Cobas-Helios analyzer, 223
- Cocaine
confirmation and quantitation in urine by GC/MS, 254
specificity of assays for, 254
- Colon, enteric distribution of cryptosporidia in AIDS and, 420
- Colon cancer
adenocarcinomas, cytokeratin immunostaining for separating from pulmonary adenocarcinomas, 764
carcinoembryonic antigen expression in rectal mucosa following resection of, 533
familial juvenile polyposis and, evolution and relationship to gastrointestinal carcinoma, 91
large cell, undifferentiated, 532
- Common acute lymphoblastic leukemia antigen, hematogones in bone marrow and, 202
- Computer imaging
evaluation of reproducibility of cytologic interpretation using, 538
Papanicolaou smear interpretation using, 537
- Computer software, for image segmentation and analysis, 538

- Condylomatous atypia, correlation of cytopathologic diagnoses with detection of, 182
- Confirmatory assay, to increase sensitivity and specificity of chlamydiazyme test, 724
- Continuous quality improvement. *See* Quality improvement
- Correlation, need for duplicate testing of common coagulation tests and, 242
- Cost, quality improvement in clinical and anatomic pathology services and, 567
- Coulter MAXM hematology analyzer, 36
- Coulter STKS hematology analyzer, 36
- Creatine kinase isoenzymes
- band between CK-MB and CK-BB caused by bacterial contamination and, 540
 - ruling out myocardial infarction in emergency room patients using, 256
- Cryoglobulinemia, mixed, type II, electron microscopic and immunochemical studies in, 278
- Cryptococemia, BACTEC NR 660 blood culture system for detection of *Cryptococcus neoformans* and, 741
- Cryptococcus neoformans*, BACTEC NR 660 blood culture system for detection of, 741
- Cryptosporidiosis, 16
- Cryptosporidium*, enteric distribution in AIDS, 420
- Cutaneous neoplasms, flow cytometric neoplastic T cell detection in mycosis fungoides and, T-cell receptor expression as basis of, 856
- Cyclin D1, in breast cancer, immunohistochemistry of, 695
- Cyclosporiasis, 16
- Cytokeratin
- basal cell, expression in prostatic carcinoma, 515
 - endothelial differentiation in angiosarcoma of thyroid gland and, 322
 - immunostaining with, for separating pulmonary and colonic adenocarcinomas, 764
- Cytology. *See also* Fine needle aspiration
- cervicovaginal, assessment of cervicovaginal smear adequacy and, 354
 - clinical microscopy and cytopathology laboratory compared for detection of malignant cells in body fluids, 439
 - correlation of cytologic examination with wet mount microscopy in rapid detection of fungi, 551
 - of Kimura's disease, in fine needle aspirates, 316
 - origin of multinucleated foreign-body-type giant cells in thyroid neoplasms and, 522
 - preparation techniques in, for fine needle aspiration of breast lesions, thin-layer and convention preparations for, 349
- Cytomegalovirus
- in diffuse interstitial pneumonia, detection of polymerase chain reaction and immunohistochemistry, 495
 - pneumonitis caused by, in lung transplant recipients
 - immunocytochemistry of bronchoalveolar washing in diagnosis of, 523
 - polymerase chain reaction versus immunohistochemistry in diagnosis of, 525
 - viral cultures and serologic tests for, 261
- Cytopathology, clinical microscopy and cytopathology laboratory compared for detection of malignant cells in body fluids, 439
- Cytopenia, hematogones in bone marrow and, 202
- Cytotoxic therapy, anti-neutrophil cytoplasmic antibody assay to distinguish between vasculitis disease activity and complications of, 589
- D**
- Delayed-type hypersensitivity, regressing genital warts and, 768
- Dendrocytes, factor XIIIa positive, in tendon sheath fibroma of, 519
- Diabetes mellitus
- long-term diabetic control in, home-based glucose monitoring program and, 554
 - patient and physician analytic goals for self-monitoring blood glucose instruments and, 611
- Diarrhea, Brainerd, 515
- Differentials
- automated, NOVA Celltrak 12 and, 306
 - leukocyte count, flow-cytochemical, with quantitation of neutrophil left shift, 223
- Differentiation antigen, urokinase-type plasminogen activator in normal and neoplastic blood cells and hematopoietic tissue and, 835
- Digoxin
- estimation of concentrations of, in volume-expanded patients with high concentrations of digoxinlike immunoreactive substances, 255
 - serum level determination by immunoassays, in serum containing digoxin immune Fab, 541
- Direct antiglobulin test, positive, HLA-DR and HLA-DQ antigen associations with, 259
- DNA
- in ovarian endometriotic cysts, 415
 - quantitation in paraffin-embedded tissue by image analysis and flow cytometry, in breast carcinoma, 528
- DNA blotting, deletion of entire α globulin locus causing α -thalassemia and, 646
- DNA flow cytometry
- of renal clear cell sarcoma, 536
 - of tubular seminoma, 397
- DNA ploidy
- in bladder cancer, prognostic factors and, 109
 - flow-cytometric analysis of nuclear DNA content in endometrial adenocarcinoma and, 341
 - flow cytometric determination in paraffin-embedded tissue, 539
 - in hepatocellular carcinoma, flow cytometric analysis of, 80
 - in ovarian endometriotic cysts, 415
 - slide-based laser scanning cytometer for DNA analysis of tumors and, 432
- Donor reactions, autologous blood donation by high-risk versus non high-risk patients and, 275
- Drug abuse screening, serum benzodiazepine concentrations determined by radioreceptor assay, for therapeutic-dose recipients, 605
- Ductal carcinoma, locally advanced, histologic grade after treatment with induction chemotherapy, 154
- Duodenal ulcer, in children, association with *Helicobacter pylori* infection, 188
- Duodenitis, in children, association with *Helicobacter pylori* infection, 188
- Duplicate testing, of common coagulation tests, need for, 242
- Dysplasia, mild, correlation of cytopathologic diagnoses with detection of, 182
- E**
- 34 β E12, in prostate cancer diagnosis, 537
- Education, proficiency testing in parasitology and, 490

- Electron microscopy
 microsporidiosis diagnosis using, in AIDS, 548
 of sarcomatoid carcinomas of lung, 331
- Electron probe microanalysis, of intracytoplasmic hyaline globules of Kaposi's sarcoma, 548
- Electrophoresis, serum protein, high-resolution, lipoproteins in, heparin effects on, 541
- Embryoma, diffuse, of testis, immunohistochemistry of, 402
- Embryonal carcinoma, immunohistochemical and DNA flow-cytometric study of, 397
- Endocervical specimens, nucleic acid probe testing versus off-site testing for *Chlamydia trachomatis* and *Neisseria gonorrhoeae* detection from, 551
- Endometrial adenocarcinoma
 flow-cytometric analysis of nuclear DNA content in, 341
 p53 protein and *c-erbB-2* protein expression in, 76
- Endometriosis
 cytologic atypia and DNA ploidy in, 415
 p53 expression in, 671
- Endometritis, chronic, localization of endometrial immune cells in, 531
- Engrafting, failure of, after bone marrow transplantation, 821
- Enterococcus*, vancomycin-resistant, media for surveillance of, 550
- Enzyme-linked immunosorbent assay
 anti-neutrophil cytoplasmic antibody determination using, 543
 repeated freeze-thaw cycles and immunoreactivity of anticardiolipin antibodies and, 586
- Eosinophilic pneumonia, acute, 525
- Epidermal growth factor, immunophenotypic detection of, in routinely processed tissue sections in granular cell tumor, 520
- Epithelial membrane antigen, endothelial differentiation in angiosarcoma of thyroid gland and, 322
- Epstein-Barr virus
 associated with posttransplant lymphoproliferative disease, latent membrane protein expression in, 545
 benign lymphoepithelial lesions of salivary glands associated with, in HIV infection, 549
 CD30 antigen expression in florid immunoblastic proliferations and, 292
 in diffuse interstitial pneumonia, detection of polymerase chain reaction and immunohistochemistry, 495
 in Hodgkin's disease, 546
 plasma cell myeloma and, in HIV-positive patients, 633
- erbB-2* receptors, in breast cancer, S13
- Erythrocytes
 automated reticulocyte counting and reticulocyte cellular indices and, 623
 flow cytometric reticulocyte analysis and, 468
 mass of, blood volume determination as function of, in preservative solutions and saline, 812
 phospholipid asymmetry in, measurement by annexin V binding, in normal and sickle-cell erythrocytes, 259
- Esophagus, pure mucinous adenocarcinoma of, clinicopathologic characterization of, 531
- Estrogen receptors
 in breast cancer
 biologic significance of quantitative immunohistochemical assay by image analysis, 158
 predictive value of, quantitative immunohistochemical analysis for evaluation of, S9
 in malignant breast tumors, immunocytochemical analysis of, 68
- Euglobulin lysis times, in fresh and stored samples, 794
- Ewing's sarcoma
 MIC2 analysis of, 692
 multiple-drug resistance in, 1
 P-glycoprotein in, before and after chemotherapy, immunohistochemical detection of, 61
- F**
- Factor VIII, endothelial differentiation in angiosarcoma of thyroid gland and, 322
- Factor X, targeted glycosylation of, as probe of structure and function, 256
- Factor XIIIa, dendrocytes positive for, in tendon sheath fibroma of, 519
- Familial juvenile polyposis, evolution and relationship to gastrointestinal carcinoma, 91
- FAN blood culture bottles, BacT/Alert anaerobic standard compared with, 551
- Female genital neoplasms, immunohistochemical analysis of p53 in, 665
- Fetal lung maturity
 predictive model for, using gestational age and test results, 788
 testing for, refrigeration and freezing of amniotic fluids and, 541
- Feulgen staining, computer-assisted quantitative description of chromatin pattern in soft tissue tumors and, 780
- Fibrin dimers, crosslinked, over time, in community dwelling elderly subjects, variability of plasma interleukin-6 and, 802
- Fibrinogen
 degradation products of, plasma-based assay for, D-dimer and serum-based assays compared with, 547
 interference in direct iron assay, 541
 in patients with history of myocardial infarction, 248
- Fibrinolysis
 euglobulin lysis times in fresh and stored samples and, 794
 orthotopic liver transplantation and bleeding diathesis and, 816
 primary hypercoagulable states and, with spontaneous or recurrent thrombosis, 797
- Fibroblast(s), diploid, varicella-zoster virus isolation and, 733
- Fibroblastic lesions, of childhood, proliferating cell nuclear antigen and Ki-67 expression in, 543
- Fibroma, of tendon sheath, factor XIIIa positive dendrocytes in, 519
- Fibrous papule, of nose, immunohistochemical characterization of, 521
- Fine needle aspiration
 of breast, thin-layer and convention preparations for, 349
 cytologic diagnosis of Kikuchi's lymphadenitis using, 454
 cytologic features of Kimura's disease and, 316
 diagnostic criteria for thyroglossal duct cysts by, 520
 of salivary glands, pitfalls of calculi and, 520
 stereotactic, of nonpalpable breast lesions, 529
 transbronchial, in suspected lung carcinoma, 525
 ultrasound-guided, of breast, nonpalpable lesions and, 98
- Flow cytochemistry, differential leukocyte count with quantitation of neutrophil left shift and, 223
- Flow cytokeratin gated S-phase fraction, correlation with proliferating cell nuclear antigen indices in formalin- and alcohol-fixed tissue, 539
- Flow cytometry. *See also* DNA flow cytometry
 in bladder cancer, prognostic factors and, 109
 CD20-positive T-cell lymphoma and, 483
 cell cycle analysis using, changes in proliferative activity of hematopoietic stem/progenitor cells from stored umbilical cord blood measured by, 546

- DNA ploidy determination using
in hepatocellular carcinoma, 80
in paraffin-embedded tissue, 539
- DNA quantitation in paraffin-embedded tissue by, in breast carcinoma, 528
- light-scatter-gated total lymphocyte ratio on flow cytometry as method for calculating total lymphocyte count, 544
- neoplastic T cell detection in mycosis fungoides and, T-cell receptor expression as basis of, 856
- nuclear DNA content in endometrial adenocarcinoma and, 341
- in paroxysmal nocturnal hemoglobinuria, glycosphosphatidylinositol-linked surface protein measurement using, 30
- polymerase chain reaction-amplified HIV-1 proviral DNA detection in infants born to seropositive mothers and, 261
- of p24 positive bone marrow mononuclear cells in myelodysplasia associated with acquired immunodeficiency syndrome, 549
- reticulocyte analysis and, 468
- single tube assay for measuring absolute CD4 counts by, 548
- slide-based laser scanning cytometer for DNA analysis of tumors and, 432
- of tubular seminoma, 397
- Fluids, clinical microscopy and cytopathology laboratory compared for detection of malignant cells in body fluids, 439
- Fluorescence *in situ* hybridization
on deparaffinized placental tissue, monosomy X demonstration by, 540
in trisomy 12, in ovarian tumors, 775
trisomy 12 detection by, in disaggregated, formalin-fixed, paraffin-embedded thyroid adenomas, 540
- Fluorescence polarization immunoassay, for triiodothyronine, 542
- Foam cells, in atherosclerosis, relationship to intimal lipid vesicles, morphometric and ultrastructural studies of, 523
- Foreign-body-type giant cells, multinucleated, in thyroid neoplasms, cytologic, histologic, and immunohistochemical study of, 522
- Fox den disease, 521
- Fungemia, BACTEC NR 660 blood culture system for detection of *Cryptococcus neoformans* and, 741
- Fungi
correlation of cytologic examination with wet mount microscopy in rapid detection of, 551
sensitivity of special stains and culture in open lung biopsy and, 736

G

- Gammopathy, triclinal, lymphocyte lymphoma mimicking, 543
- Gas chromatography, serum xylose analysis by, 595
- Gastric cancer
adenocarcinoma, familial juvenile polyposis related to, 91
carcinoma
distribution of expression of p53, Ki-67, and *c-erbB-2* in, 532
early and advanced, *bcl-2* expression in, 532
lymphoma, gastric brush cytology for detection of, 532
- Gastric metaplasia, in children, association with *Helicobacter pylori* infection, 188
- Gastric vascular ectasia, bone marrow transplantation and, 194
- Gastritis
in children, association with *Helicobacter pylori* infection, 188
Helicobacter pylori-associated, ultrastructural markers of pathogenesis of, 550
- Gastroesophageal junction pure mucinous adenocarcinoma of, clinicopathologic characterization of, 531
- Gastrointestinal hemorrhage, gastric vascular ectasia associated with bone marrow transplantation and, 194
- Gastrointestinal lymphomas, determination of B-cell clonality in paraffin-embedded endoscopic biopsy specimens of, by polymerase chain reaction, 299
- Gastrointestinal parasitology, proficiency testing in, 490
- Gender, crosslinked fibrin dimers over time in community dwelling elderly subjects and, variability of plasma interleukin-6 and, 802
- Gene mapping, deletion of entire α globulin locus causing α -thalassemia and, 646
- Genetics, deletion of entire α globulin locus causing α -thalassemia and, 646
- Genital tract, warts of, regressing, immunological events in, 768
- Genotyping, in plasma cell myeloma, in HIV-positive patients, 633
- Germ-cell tumor, mixed, of testis, immunohistochemistry of, 402
- Germinal centers, 260
- Gestational age, predictive model for fetal lung maturity using, 788
- Gi, in insulin exocytosis, 256
- Giant cell(s), foreign-body-type, multinucleated, in thyroid neoplasms, cytologic, histologic, and immunohistochemical study of, 522
- Giant cell tumor
of bone, immunohistochemical markers of lineage and proliferation in, 518
of tendon sheath, aspiration cytology of, 87
- Glandular features, recognition in benign and malignant tissue using automated techniques, 538
- Glucose monitoring
home-based, long-term diabetic control and, 554
patient and physician analytic goals for self-monitoring instruments and, 611
- Glycosphosphatidylinositol-linked surface proteins, in paroxysmal nocturnal hemoglobinuria, flow cytometric measurement of, 30
- Glycosylation, of coagulation factor X, as probe of structure and function, 256
- G-proteins, in insulin exocytosis, 256
- Graft-versus-host disease, gastric vascular ectasia associated with bone marrow transplantation and, 194
- Gram stain
cytospin, sonicated vascular catheter tip cultures associated with catheter related sepsis and, 517
interactive, image-based software for teaching interpretation of, 262
sensitivity in open lung biopsy, 736
- Granular cell tumor, immunophenotypic detection of CD68, cathepsin D and epidermal growth factor in routinely processed tissue sections in, 520
- Granulocyte colony-stimulating factor, progenitor cell mobilization induced by, CD34^{hi} lymphomononuclear cell count as measure of, during leukophoretic stem cell harvest, 258
- Granulocytic sarcomas, immunohistochemical evaluation in formaldehyde-fixed, paraffin-embedded tissue, 55
- Granulomatous disease, chronic, surgical pathology of lung in, 684
- Growth factors. *See also specific growth factors*
in breast carcinoma, quantitation with MIB1 and Ki67 antibodies, 171
prostate cancer and, S57
- Growth hormone, in serum, chemiluminescence assay for, 253
- Gynecologic tumors. *See also specific tumors*
immunohistochemical analysis of p53 in, 665

H

- Hairy cell leukemia, monoclonal immunoglobulins and quantitative immunoglobulin abnormality identification in, 580

Heart transplantation

- neuropathology of allografts and, 518
- number and severity of rejection episodes as prognostic factor for survival and, 523
- surgical pathology of recipients and, 524

Helicobacter pylori

- coccoid forms of, in human stomach, 503
- gastric metaplasia and duodenitis associated with, in children, 188
- gastritis associated with, ultrastructural markers of pathogenesis of, 550

Hemangioendothelioma, endothelial differentiation in angiosarcoma of thyroid gland and, 322**Hemangiopericytoma, sinonasal, ultrastructural and immunohistochemical study of, 520****Hematocrit, blood volume determination as function of, in preservative solutions and saline, 812****Hematogones, in bone marrow, immunophenotypic features, clinical settings, and differential diagnosis and, 202****Hematologic disease, trisomy 8 in, conventional cytogenetic versus fluorescent *in situ* hybridization in detection of, 517****Hematology**

- automated reticulocyte counting and reticulocyte cellular indices and, 623
- deletion of entire α globulin locus causing α -thalassemia and, 646
- flow-cytochemical differential leukocyte count with quantitation of neutrophil left shift, 223
- flow cytometric reticulocyte analysis and, 468
- myeloperoxidase mRNA and *bcr* gene rearrangement detection, in leukemic blasts, 258
- NOVA amperometric method for L-lactate determination in whole blood, 253
- NOVA Celltrak 12 and, 306

Hematopoiesis, extramedullary, in allograft liver, 533**Hematopoietic cells, from stored umbilical cord blood, proliferative activity of, flow cytometric cell cycle analysis measurement of, 546****Hematopoietic neoplasms, CD20-positive T-cell lymphoma and, 483****Hematopoietic precursors, CD34-positive, peripheral blood stem cell harvest in paroxysmal nocturnal hemoglobinuria, 517****Hemoglobin, derivatives of, accuracy of measurement of, in sulfhemoglobinemia, 257****Hemoglobinopathies, hydration of red cells in α and β thalassemia and, 217****Hemoglobinuria, nocturnal, paroxysmal, glycoposphatidyl-inositol-linked surface proteins in, flow cytometric measurement of, 30****Hemorrhage**

- fatal, thrombin inhibitor causing, 256
- gastrointestinal, gastric vascular ectasia associated with bone marrow transplantation and, 194
- orthotopic liver transplantation and bleeding diathesis and, 816

Heparin

- effect of uncertainty of conventional and point-of-care assays of activated partial thromboplastin time on clinical decisions in therapy using, 237
- effects on lipoproteins, in high-resolution serum protein electrophoresis, 541

Heparin removal filter, platelet aggregation and, in heparin induced thrombocytopenia, 547**Hepatic lesions, classification of, rule-based expert system from, using CAS 200 system, 534****Hepatitis A, serology evaluated by Q-probes study, 553****Hepatitis C**

- electron microscopic and immunochemical studies in, 278

prediction of primary response to interferon in patients with, by hepatocellular expression of HLA-A, B, and C molecules, 746**Hepatocellular carcinoma, DNA ploidy in, flow cytometric analysis of, 80****HER-2, in breast cancer, S13****HER-3, in breast cancer, S13****HER-4, in breast cancer, S13****Herpes simplex virus, in diffuse interstitial pneumonia, detection of polymerase chain reaction and immunohistochemistry, 495****High-resolution serum protein electrophoresis, lipoproteins in, heparin effects on, 541****Histiocytes, failure to engraft after bone marrow transplantation and, 821****Histiocytic sarcomas, clinical, histologic, and immunophenotypical study of, 45****Histologic grade, of locally advanced infiltrating ductal carcinoma after treatment with induction chemotherapy, 154****Histology, origin of multinucleated foreign-body-type giant cells in thyroid neoplasms and, 522****Histopathology**

- breast cancer prognosis based on, S3

- histologic features of breast capsules reflecting surface configuration and composition of silicone bag breast implants and, 655

Histotechnology, multitissue block and, 192**HLA-DQ, association with positive direct antiglobulin test, 259****HLA-DR, association with positive direct antiglobulin test, 259****HMB45 stain, in diagnosis of renal angiomyolipomas, 534****Hodgkin's disease**

- Epstein-Barr virus in, 546

- nodular sclerosis subtype of, *bcl-2* oncogene expression in Reed-Sternberg cells in, 464

- polymerase chain reaction analysis of t(11;14) in, 546

Hormone receptors. *See also* Estrogen receptors; Progesterone receptors

- in breast carcinoma

- immunohistochemical detection of, biochemical method and rationale for changeover in community hospital, 527

- monoclonal antibodies for detection in formalin-fixed paraffin-embedded tissue, 528

- in malignant breast tumors, immunocytochemical analysis of, 68

Human immunodeficiency virus. *See also* Acquired immunodeficiency syndrome

- acid-fast bacilli infections of bone marrow biopsy specimens in, 549
- benign lymphoepithelial lesions of salivary glands associated with Epstein-Barr virus in, 549

- polymerase chain reaction-amplified HIV-1 proviral DNA detection in infants born to seropositive mothers and, 261

- RED-DOT HIV tests for, 548

- single use diagnostic system from determination of HIV-1 antibody and, 548

Human papillomaviruses

- correlation of cytopathologic diagnoses with detection of, 182

- immunological events in regressing genital warts and, 768

- in keratoacanthomas, detection by polymerase chain reaction, 522

Human resources, management tool for reducing costs of, in laboratory, 528**Hyaline globules, intracytoplasmic, of Kaposi's sarcoma, immunohistochemical, ultrastructural, and electron probe microanalytical features of, 548****Hydrochloric acid, osteoclastic transport of, regulation by calmodulin, 257****Hyperaldosteronism, primary, plasma aldosterone-to-renin activity ratio in diagnosis of, 257**

- Hyperplastic polyps, gastric, 91
- Hypersensitivity, delayed-type, regressing genital warts and, 768
- Hypertriglyceridemia, polymorphism at nucleotide 3206 of *apo C III* gene in, amplification refractory mutation system detection of, 254
- Hypomagnesemia, 616
- Hypoventilation, associated with obesity, cardiopulmonary pathology in, 545

I

- Image analysis
 - automated edge detection in, 539
 - DNA quantitation in paraffin-embedded tissue by, in breast carcinoma, 528
 - estrogen receptors evaluated by quantitative immunohistochemical analysis, predictive value in breast cancer, 59
 - fractal dimensions for, 538
 - for nuclear grading in renal carcinoma, light microscopy compared with, 535
 - quantitative immunohistochemical assay of estrogen receptors in breast cancer by, biologic significance of, 158
 - slide-based laser scanning cytometer for DNA analysis of tumors and, 432
 - software for, 538
- Image cytometry, computer-assisted quantitative description of chromatin pattern in soft tissue tumors and, 780
- Image segmentation, software for, 538
- Immune cells, endometrial, localization in chronic endometritis, 531
- Immune complex, circulating, lymphocyte lymphoma associated with, 543
- Immunity, regressing genital warts and, 768
- Immunoassays
 - automated, enhancing performance of, 3
 - fluorescence polarization, for triiodothyronine, 542
 - serum digoxin level determination by immunoassays, in serum containing digoxin immune FAb, 541
- Immunoblastic proliferations, atypical, CD30 antigen expression in, 292
- Immunocompromised patients. *See also* Acquired immunodeficiency syndrome; Human immunodeficiency virus
 - invasive mould infections of sinuses in, surgical biopsy and frozen section in diagnosis of, 549
- Immunocytochemistry
 - of bronchoalveolar washing, in diagnosis of cytomegalovirus pneumonia, in lung transplant recipients, 523
 - of hormone receptors, in malignant breast tumors, 68
- Immunofluorescence, indirect, anti-neutrophil cytoplasmic antibody determination using, 543
- Immunoglobulins
 - gene rearrangement and
 - B-cell precursor bone marrow reconstitution after bone marrow transplantation and, 231
 - determination of B-cell clonality in paraffin-embedded endoscopic specimens of abnormal lymphocytic infiltrates and gastrointestinal lymphomas and, by polymerase chain reaction, 299
 - heavy-chain, polymerase chain reaction determination of, 259
 - monoclonal B-cell population detection in decalcified, plastic-embedded bone marrow biopsies with polymerase chain reaction and, 850
 - IgE, in localized leishmania lymphadenitis, 11
 - IgG
 - in localized leishmania lymphadenitis, 11

 chronic lymphocytic
 CD8-positive, 212
 monoclonal immunoglobulins and quantitative immunoglobulin abnormality identification in, 580
 chronic myelogenous, correlation between cytogenetic and molecular genetic changes with disease progression in, 545
 hairly cell, monoclonal immunoglobulins and quantitative immunoglobulin abnormality identification in, 580
 monocytic, clinical, histologic, and immunophenotypical study of, 45
 myeloid, immunohistochemical evaluation of infiltrates in, in formaldehyde-fixed, paraffin-embedded tissue, 55
 P-glycoprotein in, immunohistochemical detection of, 842
 plasma cell, clinical, laboratory, and morphologic findings in, 545
 S-100-positive T-cell lymphoproliferative disorder and, 478
 urokinase-type plasminogen activator receptor in, 835
- Leukemogenesis, model of leukemogenesis using novel method for rapid generation of high-titer retroviruses, 259
- Leukocyte antigens, CD20-positive T-cell lymphoma and, 483
- Leukocyte count, differential, flow-cytochemical, with quantitation of neutrophil left shift, 223
- Leukocyte differential, MAXM hematology analyzer and, 36
- Leukophoretic stem cell harvest, CD34^{hi} lymphomononuclear cell count as measure of chemotherapy/G-CSF-induced progenitor cell mobilization during, 258
- Leuprolide acetate, histopathologic findings in uterine leiomyomas treated with, findings in untreated controls compared with, 516
- Lewis Y, hepatic neoexpression and increased plasma levels of, in chronic inflammatory liver diseases, 176
- Light microscopy, for nuclear grading in renal carcinoma, image analysis compared with, 535
- Linear regression, need for duplicate testing of common coagulation tests and, 242
- Lipidemia, polymorphism at nucleotide 3206 of *apo C III* gene in, amplification refractory mutation system detection of, 254
- Lipid vesicles, intimal, in atherosclerosis, relationship to foam cells, morphometric and ultrastructural studies of, 523
- Lipoma, atypical, 677
- Lipoproteins, heparin effects on, in high-resolution serum protein electrophoresis, 541
- Liposarcoma
 sclerosing, 677
 well-differentiated, 677
- Liver biopsy, in Wilson's disease, 443
- Liver disease. *See also specific diseases*
 circulating intercellular adhesion molecule-1 concentration in, 600
 venoocclusive, gastric vascular ectasia associated with bone marrow transplantation and, 194
- Liver transplantation
 bleeding diathesis and, 816
 extramedullary hematopoiesis in allografts and, 533
- Lobular carcinoma, invasive, classical and pleomorphic variants of, correlation of mitotic figure content, Ki-67 expression, microvessel density, and survival with, 526
- Loop electrosurgical excision procedure, in cervical carcinoma, efficacy and cytologic pitfalls of, 531
- Lung
 Pneumocystis carinii detection in, in situ amplification for, 262
 surgical pathology of, in chronic granulomatous disease, 684
- Lung cancer
 abnormal p53 expression in, association with histologic subtypes and smoking history, 660
 adenocarcinomas, cytokeratin immunostaining for separating from colonic adenocarcinomas, 764
 biphasic and monophasic, 331
 non-small cell, stage I, immunoreactivity for *bcl-2* protein in, 526
 sarcomatoid, with atypical carcinoid and rhabdomyosarcomatous components, 360
 small cell
 bcl-2 protein expression in, 526
 immunohistochemical staining of small cell lung carcinoma in transbronchial and open-lung biopsy specimens and, 406
 suspected, transbronchial fine needle aspiration in, 525
- Lung maturity
 predictive model for, using gestational age and test results, 788
 testing for, refrigeration and freezing of amniotic fluids and, 541
- Lung transplantation
 biopsies of bronchial anastomotic site and, histologic findings in, 523
 bronchiolitis obliterans in allografts and, bronchiolar basement membrane changes associated with, 516
 cytomegalovirus pneumonitis and
 immunocytochemistry of bronchoalveolar washing in diagnosis of, 523
 polymerase chain reaction versus immunohistochemistry in diagnosis of, 525
 lymphoproliferative disorders following, 524
- Lupus anticoagulant
 immunoreactivity of, repeated freeze-thaw cycles and, 586
 primary hypercoagulable states and, with spontaneous or recurrent thrombosis, 797
- Lymphadenitis
 Kikuchi's, cytologic diagnosis of, fine needle aspiration for, 454
 leishmania, localized, immunohistochemistry of, 11
- Lymph nodes, axillary, benign melanocytic nevus cells in, incidence and immunohistochemistry of, 102
- Lymphoblastic lymphoma, immunohistochemical evaluation of infiltrates in, in formaldehyde-fixed, paraffin-embedded tissue, 55
- Lymphocyte(s)
 hematogones in bone marrow and, 202
 peripheral blood apoptosis and, acute infectious mononucleosis and, 544
 subsets of
 in bone marrow, reference ranges for, 544
 flow cytometric neoplastic T cell detection in mycosis fungoides and, T-cell receptor expression as basis of, 856
 T-cell lymphocytosis associated with invasive thymomas, 447
- Lymphocyte count, light-scatter-gated total lymphocyte ratio on flow cytometry as method for calculating, 544

- Lymphocyte lymphoma, associated with rheumatoid factor and circulating immune complex, 543
- Lymphocytic infiltrates, determination of B-cell clonality in paraffin-embedded endoscopic biopsy specimens of, by polymerase chain reaction, 299
- Lymphocytic leukemia, chronic
- CD8-positive, 212
 - monoclonal immunoglobulins and quantitative immunoglobulin abnormality identification in, 580
- Lymphoepithelial lesions, of salivary glands, Epstein-Barr virus associated with, in HIV infection, 549
- Lymphoid hyperplasia, polymerase chain reaction analysis of t(11;14) in, 546
- Lymphoma
- B-cell, immunohistochemical and colorimetric *in situ* hybridization staining for detection of light chain restriction in, 546
 - CD30 antigen expression in florid immunoblastic proliferations and, 292
 - diagnosis by polymerase chain reaction, 273
 - flow cytometric neoplastic T cell detection in mycosis fungoides and, T-cell receptor expression as basis of, 856
 - follicular, polymerase chain reaction amplification of t(14;18) translocation to detect residual disease, 258
 - gastrointestinal
 - determination of B-cell clonality in paraffin-embedded endoscopic biopsy specimens of, by polymerase chain reaction, 299
 - gastric brush cytology for detection of, 532
 - lymphoblastic, immunohistochemical evaluation of infiltrates in, in formaldehyde-fixed, paraffin-embedded tissue, 55
 - lymphocyte, associated with rheumatoid factor and circulating immune complex, 543
 - non-Hodgkin's, prediction of cell lineage by paraffin-resistant antibodies detectable by antibodies L26 and polyclonal CD3, 284
 - P-glycoprotein in, immunohistochemical detection of, 842
 - T-cell
 - CD20-positive, 483
 - gamma/delta posttransplantation lymphoproliferative disorder in spleen and, 310
 - S-100-positive T-cell lymphoproliferative disorder and, 478
 - urokinase-type plasminogen activator receptor in, 835
- Lymphomononuclear cell count, CD34^{hi}, as measure of chemotherapy/G-CSF-induced progenitor cell mobilization, during leukophoretic stem cell harvest, 258
- Lymphoproliferative disease, posttransplant
- Epstein-Barr virus associated with, latent membrane protein expression in, 545
 - following lung transplantation, 545
- Lypholized plasma, for calculation of International Normalized Ratio, in external quality assessment of prothrombin time, 123
- Lysozyme, in granulocytic sarcomas, immunohistochemical evaluation in formaldehyde-fixed, paraffin-embedded tissue, 55
- M**
- Macrophages
- in histiocytic sarcomas, 45
 - in monoblastic leukemias, 45
- Magnesium, 616
- Major histocompatibility complex antigens, class I, hepatocellular expression of, prediction of primary response to interferon in patients with chronic hepatitis C and, 746
- Malacoplakia, pulmonary, associated with *Rhodococcus equi* infection in acquired immunodeficiency syndrome, 459
- Male breast cancer, S25
- Malignancy. *See also specific malignancies*
- clinical microscopy and cytopathology laboratory compared for detection of malignant cells in body fluids, 439
- Malignant melanoma. *See* Melanoma
- Mammary epithelium, normal and malignant, CD44 isoform expression in, 526
- Mass spectrometry, serum xylose analysis by, 595
- Mathematical model, International Normalized Ratio and, 115
- MAXM hematology analyzer, 36
- Mean corpuscular volume, mismatch with mean platelet volume, thrombosis and, 544
- Mean platelet volume, mismatch with mean corpuscular volume, thrombosis and, 544
- Measles virus, CD46 as receptor for field isolates of, 261
- Megakaryocytes, in peripheral blood, 547
- Melanocytic nevus, benign, cells of, in axillary lymph nodes, incidence and immunohistochemistry of, 102
- Melanoma, malignant
- benign melanocytic nevus cells in axillary lymph nodes and, incidence and immunohistochemistry of, 102
 - differentiation from other melanocytic lesions, Ki-67 for, 521
 - metastatic
 - regression in Sinclair swine model, 522
 - with rhabdoid features, 426
 - p53, PCNA and cathepsin D as prognostic indicators in, 521
 - of skin, primary, parameters associated with metastatic potential in Sinclair swine model, 522
- Memory helper T cells, 260
- Metabolism, of magnesium, 616
- Metastatic lesions, of lung, abnormal p53 expression in, association with histologic subtypes and smoking history, 660
- Methenamine silver stain, sensitivity in open lung biopsy, 736
- MIB-1
- as predictor of survival in breast carcinoma, 527
 - proliferative index determination as predictor of tumor aggressiveness in breast carcinoma and, 527
 - quantitation of growth factors in breast carcinoma with, 171
- Microscopy. *See also specific types of microscopy*
- clinical microscopy and cytopathology laboratory compared for detection of malignant cells in body fluids, 439
- Microsporidial spores, in stool specimens, calcofluor white as screen for, 263
- Microsporidiosis, 16
- electron microscopic diagnosis of, in AIDS, 548
- Microvessel density, correlation with classical and pleomorphic variants of invasive lobular carcinoma, 526
- Miles H³ blood analyzer, 623
- Mitoses, nuclear DNA content in endometrial adenocarcinoma and, 341
- Mitotic figure content, correlation with classical and pleomorphic variants of invasive lobular carcinoma, 526
- Molecular biology, of breast cancer, cyclin D1 in, 695
- Monoblastic leukemias, clinical, histologic, and immunophenotypical study of, 45
- Monoclonal antibodies
- hepatic neoexpression and increased plasma levels of carbohydrate antigen in chronic inflammatory liver diseases detected by, 176
 - for hormone receptor detection in formalin-fixed paraffin-embedded tissue, in breast carcinoma, 528
 - prediction of cell lineage of diffuse aggressive non-Hodgkin's lymphoma, 528

- phomas and, paraffin-resistant antigens detectable by antibodies L26 and polyclonal CD3 for, 284
 quantitation of growth factors in breast carcinoma with, 171
 Monoclonal B cells, in hepatitis C virus infection and mixed cryoglobulinemia, type II, 278
 Monoclonal immunoglobulins, identification in hairy cell and chronic lymphocytic leukemia, 580
 Monocytes
 surface molecule expression by passenger monocytes and loss during blood bank storage and, ultraviolet-B irradiation of platelet concentrate and, 260
 urokinase-type plasminogen activator in normal and neoplastic blood cells and hematopoietic tissue and, 835
 Monocytic leukemias, clinical, histologic, and immunophenotypical study of, 45
 Monolayer techniques, for fine needle aspiration of breast lesions, thin-layer and convention preparations for, 349
 Mononucleosis, infectious, peripheral blood lymphocyte apoptosis and, 544
 Monte Carlo simulation, influence of reference mean prothrombin time on International Normalized Ratio and, 806
 Morphology, intimal lipid vesicles in atherosclerosis and, relationship to foam cells, 523
 Mould infections, invasive, of sinuses, in immunocompromised patients, surgical biopsy and frozen section in diagnosis of, 549
 Multidrug resistance
 in Ewing's sarcoma and peripheral primitive neuroectodermal tumors, 1
 immunohistochemical P-glycoprotein detection in chronic lymphoid disorders and, 842
 Multiple endocrine neoplasia, type I, duodenal and gastric neuroendocrine tumors in, 533
 Multitissue block, 192
 Mycobacteria, sensitivity of special stains and culture in open lung biopsy and, 736
Mycobacterium tuberculosis, polymerase chain reaction detection of, 552
 Myelodysplasia, AIDS-associated, flow cytometric analysis of p24 positive bone marrow mononuclear cells and, 549
 Myelogenous leukemia, chronic, correlation between cytogenetic and molecular genetic changes with disease progression in, 545
 Myeloid cells, urokinase-type plasminogen activator in normal and neoplastic blood cells and hematopoietic tissue and, 835
 Myeloid leukemia
 acute, natural killer antigen CD56/16 expression in, 545
 immunohistochemical evaluation of infiltrates in, in formaldehyde-fixed, paraffin-embedded tissue, 55
 Myeloma, plasma cell, in HIV-positive patients, 633
 Myeloperoxidase mRNA, detection in leukemic blasts, 258
 Myocardial infarction
 in emergency room patients, ruling out using creatine kinase-MB isoenzymes, 256
 fibrinolysis in patients with history of, 248
 tissue plasminogen activator and, 248
- N**
- Nafcillin, carbamazepine displacement from serum carrier proteins by, in normal and uremic sera, 255
 National Ambulatory Medical Care Survey for 1989, 553
 National Committee for Clinical Laboratory Standards, automated immunoassay performance and, 3
- Natural killer antigen, expression in acute myeloid leukemia, 545
 Needle biopsy, surgical pathology examination of prostate gland and, 572
Neisseria gonorrhoeae, nucleic acid probe testing versus off-site testing for detection from endocervical specimens, 551
 Nephrocalcinosis, prevalence, histopathology, and risk factors of, in autopsy series of infants, 535
 Nephropathy, polycythemic, morphologic changes in, 534
 Neural networks, for ovarian cancer diagnosis, 258
 Neuroblastoma
 childhood, somatostatin receptors in, 752
 immunohistochemical detection of neuroblastomatous foci in composite adrenal pheochromocytoma-neuroblastoma and, 163
 Neuroectodermal tumors
 peripheral, MIC2 analysis of, 692
 primitive, peripheral
 multiple-drug resistance in, 1
 P-glycoprotein in, before and after chemotherapy, immunohistochemical detection of, 61
 Neuroendocrine tumors
 carcinoma, of lung, 360
 in children, somatostatin receptors in, 752
 duodenal, in Zollinger-Ellison syndrome and MEN I, 533
 gastric, in Zollinger-Ellison syndrome and MEN I, 533
 Neuron-specific enolase, immunohistochemical staining of small cell lung carcinoma in transbronchial and open-lung biopsy specimens and, 406
 Neutrophils
 band counts of, for diagnosis of infection in patients with normal total leukocyte counts, 650
 urokinase-type plasminogen activator in normal and neoplastic blood cells and hematopoietic tissue and, 835
 Nevus, melanocytic, benign, cells of, in axillary lymph nodes, incidence and immunohistochemistry of, 102
 Nevus cell aggregates, in axillary lymph nodes, incidence and immunohistochemistry of, 102
 N-myc, somatostatin receptors in childhood neuroblastoma and, 752
 Nomenclature, systemized, 539
 Non-Hodgkin's lymphoma
 B-lineage, paraffin-embedded, immunophenotypic abnormalities in, 825
 prediction of cell lineage by paraffin-resistant antibodies detectable by antibodies L26 and polyclonal CD3, 284
 Nose, fibrous papule of, immunohistochemical characterization of, 521
 NOVA amperometric method, for L-lactate determination in whole blood, 253
 NOVA Celltrak 12, 306
 Nuclear rim irregularity, repeatable and quantitative measurement of, 538
 Nucleic acid probe testing, off-site testing versus, for *Chlamydia trachomatis* and *Neisseria gonorrhoeae* detection from endocervical specimens, 551

O

- Obesity, hypoventilation associated with, cardiopulmonary pathology in, 545
 Observer reliability, immunohistochemistry in assessment of tissue from purported intrauterine pregnancies and, 72
 Octreotide, somatostatin receptors in childhood neuroblastoma and, 752

Off-site testing

nucleic acid probe testing versus, for *Chlamydia trachomatis* and *Neisseria gonorrhoeae* detection from endocervical specimens, 551

patient and physician analytic goals for self-monitoring blood glucose instruments and, 611

Oncogenes. *See also specific oncogenes*

in breast cancer, S13

in gynecologic tumors, 665

in prostate cancer, S57

Open lung biopsy, sensitivity of special stains and culture in, 736

Oral anticoagulation, International Normalized Ratio and. *See* International Normalized Ratio

Osteoclasts, hydrochloric acid transport regulation by calmodulin and, 257

Ovarian borderline tumors, p53 expression in, 671

Ovarian cancer

carcinoma

immunohistochemical analysis of p53 in, 665

p53 expression in, 671

neural networks for diagnosis of, 258

serous, correlation of clinicopathologic features with immunohistochemical expression of proliferating cell nuclear antigen, p53, and *c-erbB-2*, 531

trisomy 12 in, fluorescence *in situ* hybridization analysis of, 775

P

p24, bone marrow mononuclear cells positive for, in myelodysplasia associated with acquired immunodeficiency syndrome, flow cytometric analysis of, 549

Paget's disease, immunohistochemical panel in, 521

Pancreatic transplantation, urine proteolytic activity following, 254

Papanicolaou smear

assessment of smear adequacy and, 354

interpretation using computer imaging, 537

Papilloma, of breast

cytologic distinction of, 530

large duct and peripheral, clinicopathologic study of, 529

Papule, fibrous, of nose, immunohistochemical characterization of, 521

Paraffin-embedded tissues

in breast carcinoma

immunohistochemical detection of hormone receptors in, biochemical method and rationale for changeover in community hospital, 527

MIB-1 proliferative index determination as predictor of tumor aggressiveness in, 527

monoclonal antibodies for hormone receptor detection in, 528

DNA quantitation by image analysis and flow cytometry, in breast carcinoma, 528

flow cytometric determination of DNA ploidy in, 539

formalin-fixed, nonspecific amplification in, 261

Paraffin-resistant antigens, detectable by antibodies L26 and polyclonal CD3, prediction of cell lineage of diffuse aggressive non-Hodgkin's lymphomas and, 284

Parathyroid gland, intraoperative assessment of pathology of, 365

Parotid gland cysts, tyrosine crystals in, 699

Paroxysmal nocturnal hemoglobinuria, glycoposphatidyl-inositol-linked surface proteins in, flow cytometric measurement of, 30

Partial thromboplastin time, need for duplicate testing and, 242

Pathology

in bladder cancer, prognostic factors and, 109

surgical, consultations in, 152

Pathology laboratory, management tool for increasing productivity and reducing human resources costs in, 528

p53

abnormal expression in lung cancer, association with histologic subtypes and smoking history, 660

correlation of clinicopathologic features of serous ovarian tumors with immunohistochemical expression of, 531

expression in endometrial adenocarcinoma, 76

in gastric carcinoma, distribution of expression of, 532

immunohistochemical analysis of, in gynecologic tumors, 665

in malignant melanoma, as prognostic indicator, 521

mutation and overexpression of, in prostatic carcinoma, 515

in ovarian borderline tumors and stage I carcinoma, 671

in prostatic intraepithelial neoplasia, immunoreactivity with lectin binding distribution, 535

p185, expression in endometrial adenocarcinoma, 76

Pediatrics. *See* Children

Periodic acid-Schiff-diastase stain, in diagnosis of renal angiomyolipomas, 534

Peripheral blood, megakaryocytes in, 547

Peripheral blood films, in hepatitis C virus infection and mixed cryoglobulinemia, type II, 278

Peripheral primitive neuroectodermal tumors

multiple-drug resistance in, 1

P-glycoprotein in, before and after chemotherapy, immunohistochemical detection of, 61

P-glycoprotein

in Ewing's sarcoma and peripheral primitive neuroectodermal tumors before and after chemotherapy, immunohistochemical detection of, 61

immunohistochemical detection in chronic lymphoid disorders, 842

Phencyclidine, specificity of assays for, 254

Phenotype. *See also* Immunophenotyping

in CD8-positive B-cell chronic lymphocytic leukemia, 212

hydration of red cells in α and β thalassemia and, 217

pseudocholinesterase, determination using Kodak Ektachem, comparison to phenotype using DuPont aca and genotype by dot blot following polymerase chain reaction, 540

Pheochromocytoma, immunohistochemical detection of neuroblastomatous foci in composite adrenal pheochromocytoma-neuroblastoma and, 163

Phospholipids, asymmetry of, measurement by annexin V binding, in normal and sickle-cell erythrocytes, 259

Phosphotyrosine, immunoperoxidase staining for, in breast carcinoma, nonrelationship to nuclear grade, ploidy, S-phase fraction, and p53, 527

Placental tissue, deparaffinized, monosomy X demonstration by fluorescence *in situ* hybridization on, 540

Plasma cell(s), thymomas rich in, 199

Plasma cell leukemia, clinical, laboratory, and morphologic findings in, 545

Plasma cell myeloma, in HIV-positive patients, 633

Plasmacytosis, plasma cell-rich thymomas and, 199

Plasma markers, variability of, over time, in community dwelling elderly subjects, 802

Plasminogen activator inhibitor, in patients with history of myocardial infarction, 248

Plasminogen activator inhibitor-1, orthotopic liver transplantation and bleeding diathesis and, 816

- Plastic embedding, monoclonal B-cell population detection in decalcified, plastic-embedded bone marrow biopsies with polymerase chain reaction and, 850
- Platelet(s)
contaminated, generation times of bacteria isolated from, 552
ultraviolet-B irradiation of platelet concentrate, surface molecule expression by passenger monocytes and monocyte loss during blood bank storage and, 260
- Platelet aggregation, heparin removal filter effects on, in heparin induced thrombocytopenia, 547
- Pneumocystis carinii*, in situ amplification for detection in lung tissue specimens, 262
- Pneumocystosis, 16
- Pneumonia
diffuse interstitial, cytomegalovirus, Epstein-Barr virus, and herpes simplex virus in, detection of polymerase chain reaction and immunohistochemistry, 495
eosinophilic, acute, 525
surgical pathology of lung in, 684
- Pneumonitis, cytomegalovirus, in lung transplant recipients
immunocytochemistry of bronchoalveolar washing in diagnosis of, 523
polymerase chain reaction versus immunohistochemistry in diagnosis of, 525
- Point-of-care assays
of activated partial thromboplastin time, uncertainty of, effect on clinical decisions in heparin therapy, 237
patient and physician analytic goals for self-monitoring blood glucose instruments and, 611
- Polycythemia, nephropathy in, morphologic changes in, 534
- Polymerase chain reaction
amplification of t(14;18) translocation by, to detect residual disease in follicular lymphoma, 258
Bartonella (Rochalimaea) quintana blood isolate fingerprinting using, 262
cytomegalovirus, Epstein-Barr virus, and herpes simplex virus detection by, in diffuse interstitial pneumonia, 495
cytomegalovirus pneumonitis diagnosis using, in lung transplant recipients, 525
determination of B-cell clonality in paraffin-embedded endoscopic biopsy specimens of abnormal lymphocytic infiltrates and gastrointestinal lymphomas by, 299
diagnosis of lymphomas by, 273
HIV-1 proviral DNA amplified by, flow cytometric detection in infants born to seropositive mothers and, 261
human papillomavirus detection by, in keratoacanthomas, 522
immunoglobulin heavy-chain gene rearrangement determination by, 259
monoclonal B-cell population detection in decalcified, plastic-embedded bone marrow biopsies with, 850
Mycobacterium tuberculosis detection by, 552
with single strand conformation polymorphism analysis, T cell receptor gamma rearrangements detection by, 516
in situ, nonspecific amplification in formalin-fixed paraffin-embedded tissues using, 261
t(11;14) analysis by, in reactive lymphoid hyperplasia and Hodgkin's disease, 546
- Polymorphism, at nucleotide 3206 of *apo C III* gene, in hypertriglyceridemia and lipidemia, amplification refractory mutation system detection of, 254
- Polymorphonuclear neutrophilic leukocytes, in renal transplantation biopsies, 534

- Retention cysts, of parotid gland, tyrosine crystals in, 699
- Reticulocytes
 - automated reticulocyte counting and reticulocyte cellular indices and, 623
 - flow cytometric analysis of, 468
- Retroperitoneum, smooth muscle tumors of, morphologic predictors of biologic behavior of, 519
- Retroviruses, model of leukemogenesis using novel method for rapid generation of high-titer retroviruses, 259
- Rhabdoid tumor, 426
- Rhabdomyosarcoma
 - differentiation of, dedifferentiated chondrosarcoma with, 519
 - of lung, 360
- Rheumatoid factor, lymphocyte lymphoma associated with, 543
- Rhodococcus equi* infection, in acquired immunodeficiency syndrome, pulmonary malacoplakia associated with, 459
- Round-cell tumors, small, immunohistochemical evaluation of infiltrates in, in formaldehyde-fixed, paraffin-embedded tissue, 55

S

- Safety, for laboratory phlebotomists using Q-probes, 553
- Salicylate, carbamazepine displacement from serum carrier proteins by, in normal and uremic sera, 255
- Saline, histologic features of breast capsules reflecting surface configuration and composition of silicone bag breast implants and, 655
- Salivary glands, fine needle aspiration of, pitfalls of calculi and, 520
- SAPHO syndrome, histologic features of, 518
- Sarcoidosis, transbronchial biopsy in diagnosis of, histologic and clinical correlates of, 545
- Sarcoma. *See also specific types of sarcoma*
 - granulocytic, immunohistochemical evaluation in formaldehyde-fixed, paraffin-embedded tissue, 55
 - histiocytic, clinical, histologic, and immunophenotypic study of, 45
 - renal, clear cell, ultrastructural, immunohistochemical, and DNA flow cytometric analysis of, 536
 - soft tissue, immunoreactivity of CD44 in, 519

- Sarcomatoid tumors
 carcinoma
 endothelial differentiation in angiosarcoma of thyroid gland and, 322
 of lung, with atypical carcinoid and rhabdomyosarcomatous components, 360
 of upper respiratory tract, after irradiation, 525
- Screening tests, coagulation, 150
- Seminoma
 morphological variation in, 395
 tubular, immunohistochemical and DNA flow-cytometric study of, 397
- Sensitivity
 manufacturer-determined, instrument-specific international sensitivity index values for calculating International Normalized Ratio and, 128123
 of special stains and culture in open lung biopsy, 736
- Septicemia, BACTEC NR 660 blood culture system for detection of *Cryptococcus neoformans* and, 741
- Serum protein electrophoresis, high-resolution, lipoproteins in, heparin effects on, 541
- Sex cord-stromal tumor, immunohistochemical and DNA flow-cytometric study of, 397
- Sickle-cell erythrocytes, phospholipid asymmetry in, measurement by annexin V binding, 259
- Silicone bag breast implants, histologic features of breast capsules reflecting surface configuration and composition of, 655
- Silver stain, with single strand conformation polymorphism analysis, T cell receptor gamma rearrangements detection by, 516
- Single strand conformation polymorphism analysis, with polymerase chain reaction and silver stain, T cell receptor gamma rearrangements detection by, 516
- Sinonasal hemangioepithelioma, ultrastructural and immunohistochemical study of, 520
- Sinuses, invasive mould infections of, in immunocompromised patients, surgical biopsy and frozen section in diagnosis of, 549
- Skin
 atypical vascular lesions of, after radiation therapy for breast carcinoma, 757
 primary melanomas of, parameters associated with metastatic potential in Sinclair swine model, 522
- Sleep apnea/obesity hypoventilation syndrome, cardiopulmonary pathology in, 545
- Slides, fully frosted, frosted tip, and positively charged, cell retention/loss among, 537
- Small cell carcinoma, MIC2 analysis of, 692
- Small intestine, enteric distribution of cryptosporidia in AIDS and, 420
- Smoking, abnormal p53 expression in lung cancer associated with, 660
- Smooth muscle tumors, of retroperitoneum and abdomen, morphologic predictors of biologic behavior of, 519
- Soft tissue tumors
 computer-assisted quantitative description of chromatin pattern in, 780
 giant-cell tumor of tendon sheath, aspiration cytology of, 87
 sarcomas, immunoreactivity of CD44 in, 519
- Somatostatin receptors, in childhood neuroblastoma, 752
- Specimen adequacy, assessment of cervicovaginal smear adequacy and, 354
- S-phase fraction, flow cytokeratin gated, correlation with proliferating cell nuclear antigen indices in formalin- and alcohol-fixed tissue, 539
- Spindle-cell carcinoma, of lung, 331
- Spleen, gamma/delta posttransplantation lymphoproliferative disorder in, 310
- Spontaneous abortion, during first trimester, histology and *Ureaplasma urealyticum* culture in, 729
- S-100 protein
 incidence and immunohistochemistry of benign melanocytic nevus cells in axillary lymph nodes and, 102
 S-100-positive T-cell lymphoproliferative disorder and, 478
- Squamous cells, atypical, of undetermined significance, correlation of cytopathologic diagnoses with, 182
- Squamous intraepithelial lesion, correlation of cytopathologic diagnoses with detection of, 182
- Statistical bias, influence of reference mean prothrombin time on International Normalized Ratio and, 806
- Statistical confidence, International Normalized Ratio and, 115
- Stem cells
 peripheral blood stem cell harvest of CD34-positive hematopoietic precursors in paroxysmal nocturnal hemoglobinuria and, 517
 from stored human umbilical cord blood procedure, number of colonies produced by and factor-dependent cell cycle of, 260
- Stereotactic breast core biopsies, quality and efficacy of, in malignant tumors, 529
- Stomach. *See also* Gastric entries
 coccoid forms of *Helicobacter pylori* in, 503
- Streptococcus*
 Group A, identification from throat swabs, Strep A OIA and culture method compared for, 550
 Group B, α C protein tandem repeat variant expression of immunoreactive products by, 262
- Study methods, liver biopsy diagnosis of Wilson's disease, 443
- Sulfamethoxazole, carbamazepine displacement from serum carrier proteins by, in normal and uremic sera, 255
- Sulfhemoglobinemia, hemoglobin derivatives in, accuracy of measurement of, 257
- Suppressor genes, in breast cancer, S13
- Surgical pathology, consultations in, 152
- Survival
 in breast cancer, MIB-1 as predictor of, 527
 correlation with classical and pleomorphic variants of invasive lobular carcinoma, 526
 following heart transplantation, number and severity of rejection episodes as prognostic factor for, 523
- Syndecan-1 mRNA, regulation during B lymphocyte differentiation, 543

T

- t(11;14), polymerase chain reaction analysis of, in reactive lymphoid hyperplasia and Hodgkin's disease, 546
- T cell(s)
 gamma/delta posttransplantation lymphoproliferative disorder in spleen and, 310
 helper
 memory, 260
 proportion expressing β -1 integrin receptor CD29 in AIDS, 260
 prediction of cell lineage of diffuse aggressive non-Hodgkin's lymphomas and, paraffin-resistant antigens detectable by antibodies L26 and polyclonal CD3 for, 284
 receptor gamma rearrangements of, rapid and sensitive detection by single strand conformation polymorphism analysis combined with polymerase chain reaction and silver stain, 516
 S-100-positive T-cell lymphoproliferative disorder and, 478
 T-cell lymphocytosis, associated with invasive thymomas, 447

- T-cell lymphoma
 CD20-positive, 483
 gamma/delta posttransplantation lymphoproliferative disorder in spleen and, 310
 S-100-positive T-cell lymphoproliferative disorder and, 478
 Telepathology, in private practice setting, 552
 Tendon sheath
 fibroma of, factor XIIIa positive dendrocytes in, 519
 giant-cell tumor of, aspiration cytology of, 87
 Terminal deoxynucleotidyl transferase staining, in acute leukemia, 640
 Testis
 diffuse embryoma of, immunohistochemistry of, 402
 tubular seminoma of, immunohistochemical and DNA flow-cytometric study of, 397
 Test utilization, central versus satellite laboratory testing of blood gases and, quantification of medical and operational factors determining, 7
 α -Thalassemia, deletion of entire α globulin locus causing, 646
 Thalassemia, hydration of red cells in α and β thalassemia and, 217
 Therapeutic abortion, during first trimester, histology and *Ureaplasma urealyticum* culture in, 729
 Thiazole orange, flow cytometric reticulocyte analysis and, 468
 ThinPrep processor, in nongynecologic specimens, 537
 Thrombin, inhibitor of, fatal hemorrhage caused by, 256
 Thrombocytopenia, heparin induced, heparin removal filter effects on platelet aggregation in, 547
 Thromboembolism, primary hypercoagulable states and, 797
 Thromboplastin, standard versus sensitive, for monitoring low intensity oral anticoagulant therapy, 134
 Thrombosis, mean platelet volume/mean corpuscular volume mismatch and, 544
 Thymic neoplasms, invasive, T-cell lymphocytosis associated with, 447
 Thymoma
 invasive, T-cell lymphocytosis associated with, 447
 plasma cell-rich, 199
 Thyroglobulin, endothelial differentiation in angiosarcoma of thyroid gland and, 322
 Thyroglossal duct cysts, diagnostic criteria by fine needle aspiration for, 520
 Thyroid
 adenomas of, disaggregated, formalin-fixed, paraffin-embedded, fluorescence *in situ* hybridization for detection of trisomy in, 540
 angiosarcoma of, endothelial differentiation and, 322
 neoplasms of, origin of multinucleated foreign-body-type giant cells in, cytologic, histologic, and immunohistochemical study of, 522
 orbitopathy and, thyrotropin receptor antibody levels related to severity of, 516
 Thyroid-stimulating hormone, automated immunoassay performance and, 3
 Thyrotropin, receptor antibody levels related to severity of thyroid orbitopathy and, 516
 Tissue sampling, multitissue block and, 192
 Tissue-type plasminogen activator, orthotopic liver transplantation and bleeding diathesis and, 816
 Tonsils, CD30 antigen expression in florid immunoblastic proliferations and, 292
 Total quality management, quality improvement in clinical and anatomic pathology services and, 567
 Toxoplasmosis, 16
 Transbronchial biopsy, sarcoidosis diagnosed by, histologic and clinical correlates of, 545
 Transitional cell carcinoma, of bladder, prognostic factors in, pathologic, immunohistochemical, and DNA flow-cytometric study of, 109
 Transplantation. *See specific organs*
 Transurethral resection, surgical pathology examination of prostate gland and, 572
 Triclonal gammopathy, lymphocyte lymphoma mimicking, 543
 Triiodothyronine, fluorescence polarization immunoassay for, 542
 Trisomy 12
 fluorescence *in situ* hybridization for detection of, in disaggregated, formalin-fixed, paraffin-embedded thyroid adenomas, 540
 in ovarian tumors, fluorescence *in situ* hybridization analysis of, 775
 Trisomy 8, in hematologic disease, conventional cytogenetic versus fluorescent *in situ* hybridization in detection of, 517
 Trophoblast, in purported intrauterine pregnancies, immunohistochemistry in assessment of tissue from, 72
 t(14;18) translocation, polymerase chain reaction amplification of, to detect residual disease in follicular lymphoma, 258
 Tubular seminoma, immunohistochemical and DNA flow-cytometric study of, 397
 Tumor suppressor genes, prostate cancer and, S57
 Tumor volume, in prostate cancer, prostate-specific antigen and, S31
 Tyrosine crystals, in parotid gland cysts, 699
- ## U
- Ulcer, duodenal, in children, association with *Helicobacter pylori* infection, 188
Ulex europaeus I lectin, endothelial differentiation in angiosarcoma of thyroid gland and, 322
 Ultrasound-guided biopsy, of breast, nonpalpable lesions and, 98
 Ultrastructure
 in hepatitis C virus infection and mixed cryoglobulinemia, type II, 278
 intimal lipid vesicles in atherosclerosis and, relationship to foam cells, 523
 of intracytoplasmic hyaline globules of Kaposi's sarcoma, 548
 of renal clear cell sarcoma, 536
 of sinonasal hemangiopericytoma, 520
 ultrastructural markers of pathogenesis of *Helicobacter pylori*-associated gastritis and, 550
 Ultraviolet-B irradiation, of platelet concentrate, surface molecule expression by passenger monocytes and monocyte loss during blood bank storage and, 260
 Umbilical cord blood, stored
 proliferative activity of hematopoietic stem/progenitor cells in, flow cytometric cell cycle analysis measurement of, 546
 stem cells from, number of colonies produced by and factor-dependent cell cycle of, 260
Ureaplasma urealyticum, histology and culture of, in first trimester abortion, 729
 Uremia, free valproic acid concentrations in serum and, 253
 Urinary bladder
 ASCP survey on anatomic pathology examination of, 715
 cancer of, prognostic factors in, pathologic, immunohistochemical, and DNA flow-cytometric study of, 109
 Urine
 confirmation and quantitation of cocaine in, byGC/MS, 254
 proteolytic activity in, in pancreatic transplant patients, 254
 Urokinase-type plasminogen activator receptor, in normal and neoplastic blood cells and hematopoietic tissue, 835
 Uterine carcinoma, immunohistochemical analysis of p53 in, 665

- Uterine curetting, in purported intrauterine pregnancies, immunohistochemistry in assessment of tissue from, 72
 Uterine leiomyoma, treated with leuprolide acetate, histopathologic findings compared with findings in untreated controls, 516

V

- Vaccination, regressing genital warts and, 768
 Validation, International Normalized Ratio and, 115
 Valproic acid, free, in uremic sera, 253
 Vancomycin-resistant *Enterococcus*, media for surveillance of, 550
 Varicella-zoster virus, rhesus monkey kidney cells for isolation of, 733
 Vascular lesions, atypical, of skin, after radiation therapy for breast carcinoma, 757
 Vasculitis, anti-neutrophil cytoplasmic antibody assay to distinguish between complications of cytotoxic therapy and, 589
 Vimentin, endothelial differentiation in angiosarcoma of thyroid gland and, 322
 Viral infections, rhesus monkey kidney cells for isolation of, 733
 Volume expansion, estimation of digoxin concentrations and, in volume-expanded patients with high concentrations of digoxinlike immunoreactive substances, 255
 von Hippel-Lindau disease, microscopic premalignant and malignant renal lesions in, loss of chromosome 3p heterozygosity in, 515
 von Willebrand factor, in patients with history of myocardial infarction, 248

W

- Warts, genital, regressing, immunological events in, 768
 Wegener's granulomatosis, anti-neutrophil cytoplasmic antibody assay to distinguish between complications of cytotoxic therapy and, 589
 Western blot, anti-mitochondrial and anti-liver/kidney microsomal autoantibody determination using, 542
 Wet mount microscopy, correlation of cytologic examination with wet mount microscopy in rapid detection of fungi, 551
 White blood cell differentials, automated, in children, 544
 Wilson's disease, liver biopsy diagnosis of, 443

X

- Xylose, serum, gas chromatography/mass spectrometry analysis of, 595

Y

- Yeast, in blood cultures, BACTEC NR 660 blood culture system for detection of *Cryptococcus neoformans* and, 741
 Yolk sac tumor, immunohistochemical and DNA flow-cytometric study of, 397

Z

- Zollinger-Ellison syndrome, duodenal and gastric neuroendocrine tumors in, 533

Book Reviews

- Body Fluids*, 140
